SECLUSION OR SECURITY.

INTRODUCTION

Welcome to the world of the hybrid-workplace.

Working environments need to re-enchant users in order to overcome return to work anxiety. They need to cater for increased levels of sensitivity in all populations, not least of all for a silent majority of users who are not extroverts.

Greater levels of workspace flexibility are needed in order to empower evolution of space as circumstances drive new utilisation challenges.

Nook was created to bring psychological and neurological safety quickly and easily in to the workplace, while adding elements of flexibility and modularity.

Nook are an affordable, plug-and-play, sanctuary space for improving flexibility, engagement, ad-hoc meeting volume, wellness, inclusivity and sustainability.

NOTEWORTHY CREDENTIALS

- DESIGN FOR SOCIAL GOOD AWARD WINNER
- CERTIFIED AUTISM RESOURCE
- CONTRIBUTES TO WELL, BREEAM AND LEAD
- COWORKING INNOVATION AWARD WINNER
- DESIGN FOR EDUCATION AWARD WINNER
- CIRCULAR DESIGN

THE RANGE

The Nook Family consists of a modular Huddle pod, an accessible Shelter space and a personal Solo booth in both open and closed formats.

These three products work together or apart and form an ideal partnership, creating space within space, accessible physical and mental inclusivity, organisational flexibility, and genuine engagement.

FOCUS ON: NEUROINCLUSIVITY

We believe that **'design for the extreme, benefits the mean'** - design with very specific - often forgotten - needs in mind, and the results will improve life for all. We believe that the built environment serves all of us poorly because of this neglect.

Our story starts with a focus on neurodivergent minds: our friends with autism, dyslexia, ADHD, Highly Sensitive People, Introverts and so on. Our minds can be so powerful and beautiful, when liberated from societal limitations. We want to make that freedom normal.

Nook was crafted on principles of safety-informed-design. It is a sensory sanctuary, a stimuli-reducing comfort-space. A place to recharge and reset. A personal retreat for a sensitive mind to perform vital self-care, where all minds benefit in softer similar ways.

Since its introduction in 2016, **Nook has won awards for its Design For Social Impact and been certified as an Autism Resource** by the International Board for Credentialing and Continued Education Standards.

It has achieved these accolades by blending psychological science, acoustic performance, architectural form, physical comfort, material science and the principles of The United Nation's Sustainable Development Goals.

We strive to help create a kinder world and believe that our built environments play a crucial role in setting the scene for greater diversity, equity and inclusivity.

We would love to help make your space more powerful and engaging for all minds.

FOCUS ON: SUSTAINABILITY

When you invest in Nook, these are the principles you are investing in. This is how we see our responsibilities in terms of sustainability, working towards a circular economy and towards positive impact.

Source responsibly, make recyclable.

These are the bookends of sustainability. We source responsibly, for example, using FSC certified wood products and recycled fabrics. And we strive to make our product as recyclable as possible so that it can be taken apart and stripped back to its recyclable elements.

Sustainable Manufacturing

We take care to maximise use of material, using 'waste' to create useful accessories, complimentary products or elements for other projects. What leftover there is, our partners turn in to heat which is used for facilities in the factories. Solar panels help to further greatly reduce carbon footprint.

Design To Last

We care about product durability. We advocate for buying fewer better things which last longer. We build Nook to thrive in challenging long-term use. We design for backwards compatibility. Furniture needs to evolve with a space instead of being thrown-out. We help pre-loved Nooks find new homes. We work with organisations to make Nook more affordable and available to all.

We are active participants in:

Association of Sustainability Practitioners
SME Climate Hub
Event Cycle and Isla, both driving event industry sustainability
Signatory, We Mean Business Coalition Open Letter to G20 Leaders

NOOK HUDDLE POD

The Nook Huddle Pod is our flagship product, beloved of users across a wide variety of applications and space types.

In its essence, it is a sanctuary space for calm focus, for good conversation and improved engagement.

Panels can be removed to place at a window or join nooks together.

The table space is generous and accommodates up to 4 people working on laptops.

NOOK SOLO

The Nook Solo Booth, available with or without door, is a key solution to the increase in video call volume.

A personal alcove, providing distraction-free focus for caller and recipient, the Nook Solo is designed to help organisations quickly adapt and flex as its space usage evolves.

Inside is a comfortable seated working area with user controllable lighting, adjustable ventilation and power points. Personalisation and productivity packed in to an efficient pod.

NOOK SHELTER

The Nook Shelter is a paradigm shifting product for making greater use of existing space and current furniture assets. Combine with onsite resources to create a mindful and inclusive sanctuary space.

Dovetails with Nook Huddle pod to create a more enclosed space within a space theatre.

Fit with AV assets to host presentations.

Install adjustable height desking to create a wheelchair accessible protective workstation.
